

Mini Stagebox 32i

Soundcraft®
by HARMAN

HIGHLIGHTS ■

Studer designed preamps

Preamps designed by the legendary Studer brand give users professional-quality equipment.

32 total remote controlled mic inputs

Dedicated XLR mic pre inputs allow 32 simultaneous channels of external analog input.

12 analog outputs

Easily connect to your on stage house, monitors, and broadcast/streaming feeds

Consistent control from Soundcraft Si series of mixing consoles

Simple to add additional Pre/I/O at a distance, with just a RJ45/Cat5 style connection between.

KEY MESSAGE ■

The new Soundcraft Mini Stagebox 32i offers customers multiple channels of remote controlled I/O for Soundcraft Si series products, including the Si Impact mixing console. The Mini 32i stagebox is equipped with high-quality components, including Studer-designed preamps, to deliver exceptional sound quality, convenience and robust ease-of-use.

The Mini Stagebox 32i is perfect for live sound engineers, houses of worship, bands, club owners and corporate customers that want affordable remote-controlled I/O for their Soundcraft Si series console. It delivers the input power, versatility and sound quality of large-scale traditional mixing solutions—all at an incredible value. Combined with the new Soundcraft Si Impact firmware update, the new Mini 32i makes the Si line more compelling and more flexible than ever.

Soundcraft Mini Stagebox 32i provides multiple channels of audio inside MADi I/O via standard Cat5 cabling, eliminating the need to run expensive and heavy analog snakes from the stage to front-of-house mixing positions. It also offers remarkable value while maintaining the industry-leading performance and dependability found in Soundcraft live solutions.

Mini Stagebox 32i features a streamlined design that provides essential connections and features, including a MADi over RJ45 connector built right onto the chassis. No local hardware configuration or option cards are needed or required—engineers can simply plug in, power on, select inputs and control remotely using a Soundcraft Si console.

Dedicated XLR mic pre inputs allow 32 simultaneous channels of external analog input as well as 12 analog outputs, for easy connection to house and stage monitors and broadcast or streaming feeds.

SPECIFICATIONS ■

- MADI over RJ45/Cat5 connectivity
- 32 remote controlled mic preamps and A/D converters
- 12 XLR analog line level outputs
- 3U Rack mount design

TECHNICAL SPECIFICATIONS ■

Ins/Outs:	Analog 32 in, 16 out
Mic Preamps:	32
Remote Controllability:	From Soundcraft Si Consoles
Cat5 Connected to Mixing Console:	Yes
Additional or Substitute I/O:	Additional I/O on Si Console Series

SOUNDCRAFT SI IMPACT FIRMWARE UPDATE ■

HARMAN recently released a free firmware update for the Soundcraft Si Impact mixing console that enables up to 80 mix tracks when used in conjunction with stageboxes. The update allows Si Impact owners to add a stagebox for additional inputs, while simultaneously using the existing console inputs. By adding a second MADI option card to the console, customers can add a second stagebox and select which inputs to assign to the 80 mixing channels. In addition, with up to 80 total mix tracks, customers can now handle more complex mixing scenarios, like adding an optional Dante card for receiving from a house router, or outputting to either the back of their console or the stagebox—all while recording up to 32 tracks over USB to a connected digital audio workstation.

ORDER SPECIFICATIONS ■

Box Dims (L X W X H):	21.2x16.6x9.4in.
Shipping Weight:	15 lbs
Country of Origin:	CN
SKU Name:	Mini Stagebox 32i US
SKU Number:	5074417
UPC CODE:	668705002622
